

Parasitic Diseases

Filesize: 1.74 MB

Reviews

This publication will never be effortless to begin on studying but extremely entertaining to learn. It is probably the most incredible publication i have go through. I realized this ebook from my i and dad suggested this publication to learn.

Condition: New. Publisher/Verlag: Springer, Berlin | Worldwide, the numbers of people suffering and dying from parasitic diseases are overwhelming, with more than 100 million cases and 1 million deaths each year from malaria alone. Despite the magnitude of the problem and the importance of the parasites that cause opportunistic infections among persons with HIV/AIDS, medical schools in the United States, Canada, and other developed countries consistently reduce the amount of time spent on parasitic diseases in the curriculum. As a result most medical students receive limited information about these diseases, and are inadequately prepared to diagnose or treat them as physicians. This problem is too large to be resolved within the time available for parasitology in the medical school curriculum; at most, students can be acquainted with the salient features of the medically important parasites. Likewise, the traditional isolation of parasitology from the rest of the curriculum (consistent with its exclusion from most microbiology texts) is another unresolved problem. In my opinion, this is why most physicians are unable to think about the differential diagnosis of parasitic diseases in the same way that they routinely balance the probabilities of malignancy, cardiovascular, renal, and pulmonary disease vs other infectious diseases. To resolve these problems, relevant paradigms from parasitology must be used in the teaching of cell biology, molecular biology, genetics, and immunology. | I. Nematodes.- 1. Enterobius vermicularis (Linnaeus 1758).- 2. Trichuris trichiura (Linnaeus 1771).- 3. Ascaris lumbricoides (Linnaeus 1758).- 4. Hookworms: Necator americanus (Stiles 1902) and Ancylostoma duodenale (Dubini 1843).- 5. Strongyloides sp.: Strongyloides stercoralis (Bavay 1876) and Strongyloides fuelleborni (Von Linstow 1905).- 6. Trichinella spiralis (Railliet 1896).- 7.
