Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English Brand New Book ***** Print on Demand *****.Excerpt from A Second Book in Algebra The present volume contains a second course in algebra adapted to the latter part of the High School curriculum. The book is divided into two parts, Part One being meant for use in such classes as give only a half year to the second course in algebra, while the entire volume is to be used by classes giving a whole year to the second course. In half-year classes, Part Two will constitute a reservoir of extra work for bright pupils. The features which characterize the authors First Book in Algebra are continued and developed. Extended use is made of the graph, among other advances being the per capita and efficiency curves and dissected bar graphs. In the treatment of the formula, the pupil is asked more frequently to supply letters and to devise the complete formula. No other part of algebra so develops thought power and cultivates an appreciation of the spirit of algebra as does the verbal problem. Accordingly, more difficult and varied verbal problems are supplied, many being given in the inverse form, where the conditions of a problem are stated in symbols and the pupil is asked to convert the symbolic statement into general language. Throughout the book, pivotal and permanently valuable numbers, facts and laws from other branches of study are introduced in various ways. This gives a correlation of algebra with geography, history, economics, and other school studies. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving...
