CreateSpace Independent Publishing Platform. Paperback. Book Condition: New. This item is printed on demand. Paperback. 152 pages. Dimensions: 11.0in. x 8.5in. x 0.3in. This book is a B and W copy of government agency publication. Diabetes is one of the most common chronic diseases in school-aged children, affecting about 200,000 young people in the United States. According to recent estimates, about 19,000 youths are diagnosed with type 1 and type 2 diabetes each year. Diabetes is a serious chronic disease in which blood glucose (sugar) levels are above normal due to defects in insulin production, insulin action, or both. Diabetes is the sixth leading cause of death by disease in the United States. Long-term complications of diabetes include heart disease, stroke, blindness, kidney failure, nerve disease, gum disease, and amputation of the foot or leg. Although there is no cure, diabetes can be managed and complications can be delayed or prevented. For students with diabetes, major advances in diabetes management, medical research, and technology mean a brighter and healthier future. Research shows that well-managed blood glucose levels not only can help young people stave off the long-term complications of diabetes but also help them feel better, happier, and more productive at school. In a supportive school environment, where school personnel understand the needs of students with diabetes and can respond appropriately in emergency situations, young people can manage their diabetes effectively throughout the school day and at school-sponsored activities. In 2003, the National Diabetes Education Program (NDEP) produced the first edition of *Helping the Student with Diabetes Succeed: A Guide for School Personnel* to educate and inform school personnel about diabetes, how it is managed, and how each member of the school staff can help meet students' needs and make the school experience safe for students with diabetes. NDEP has...
