The failure to understand the form, function, and logic of clandestine cellular networks has led to the incorrect application of counternetwork operations based on ill-informed counternetwork theories. This monograph defines counternetwork operations as a subset of counterinsurgency and counterterrorism operations. Like counterinsurgency operations, counternetwork operations are focused on a specific element of the insurgency. During this time, counternetwork operations have primarily focused on targeting key leaders, facilitators, individuals with special skills, or highly-connected individuals, all of which intuitively seem to be the correct targets for disconnecting clandestine cellular networks. However, there has been little comparative analysis done to verify if these operations are in fact having the overall effect required to disrupt, neutralize, defeat, or ultimately destroy these networks. Understanding the...
