Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Interfaces to Teleoperation Devices This document describes a basic logical architecture for teleoperation control devices and interfaces for integrating these devices with a telerobot control system architecture. The interfaces described are for manipulator control only. They do not consider articulated end effector control, although an interface for this can be viewed as a special case of the interfaces described here. Most end-effectors currently available have only one motion to open or close the fingers. Thus they require only one data element in the interface to specify finger position. This could easily be added to the described interfaces. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
