paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Publisher: Xi an Jiaotong University Press Pub. Date :2006-10-01. book to use Feng Chi Zhang. Xi-Kui Ma editor of the Introduction to Engineering Electromagnetic Fields (Higher Education Press) as a textbook for teachers and students for teaching or learning counseling and written. Also the author of many years of teaching experience. The book is 8. Each chapter includes basic content and formulas. important and difficult. a typical problem resolution. self-test questions and other 4 parts. This book focuses on the important and difficult analysis. and selection of typical questions a detailed analysis and answers. Book collection of a considerable number of typical questions. each question selected have sought new and starting from the analysis of questions intended to guide the problem-solving skills to enhance students analyze and solve problems. In order to highlight some of the typical problem-solving approach. this book is almost done for each question a comment. Contents: Series General Preface Introduction Chapter 1 the basic content of the electrostatic field and the formula 1.1 1.1.1 1.1.2 Potential field strength of the electrostatic field in the conductor and dielectric boundaries of the basic equation 1.1.3 electrostatic surface of the electrostatic field convergence condition 1.1.4 The boundary value problem of Theorem 1.1.5 only the electrostatic field solution of several boundary value partial capacitance 1.1.7 1.1.6 1.2 electrostatic energy important and difficult field strength and potential 1.2.1 1.2.2 and calculation of static on the sidelines seeking value problem the solution of the direct integration method 1.2.3 axis mirror method and substance of the law and the electrostatic energy calculation step 1.2.4 1.3 1.4 parsing problems typical self-test questions in Chapter 2 the basic content of 2.1 and a constant...
