Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from Forest Fuels on Organic and Associated Soils in the Coastal Plain of North Carolina The fire problem in the organic soil (pocosin) areas of eastern North Carolina centers around the frequent and costly blowup 1/ wildfires occurring there and the use of fire as a management tool. Under certain combinations of fuel and weather, low intensity fires will suddenly and often unexpectedly multiply their rate of energy output many times. In almost all instances these fires have been virtually uncontrollable until the weather has moderated or the fire has run out of fuel. Efforts at control are often greatly hampered by inaccessibility and the poor soil trafficability in much of the area. Prescribed fire appears to be a potentially valuable tool in the manage ment of pond pine by promoting seed fall from the serotinous cones and in preparing the seedbed. Fires of sufficient intensity to achieve these results, however, are usually difficult to control and tend to burn deeply into the or ganie soil. The problem has become more acute in the past 10 years because of the increased commercial importance of the pocosins as pulpwood and timber producing areas. A better understanding of the behavior of fires in the pocosins, especially of the factors that favor the occurrence of major fires, could contribute much to the economy of this particular region as well as to the general fund of basic fire behavior knowledge. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in...
