

Graph Groupoids and Partial Isometries

Filesize: 1.28 MB

Reviews

*This composed publication is fantastic. This is certainly for all those who statte that there was not a well worth reading through. You will not truly feel monotony at whenever you want of your respective time (that's what catalogs are for regarding when you ask me).

GRAPH GROUPOIDS AND PARTIAL ISOMETRIES

[DOWNLOAD](#)

LAP Lambert Academic Publishing. Paperback. Condition: New. 92 pages. Dimensions: 8.7in. x 5.9in. x 0.2in. In this monograph, we consider the connection between graphs and Hilbert space operators. In particular, we are interested in the algebraic structures, called graph groupoids, embedded in operator algebras. In Part 1, we consider the connection from graphs to partial isometries. Every element in graph groupoids assigns an operator, which is either a partial isometry or a projection, under suitable representations. The von Neumann algebras induced by the dynamical systems of graph groupoids are characterized. In Part 2, we observe the connection from partial isometries to graphs. We show that a finite family of partial isometries on a fixed Hilbert space H creates the corresponding graph, and the graph groupoid of it is an embedded groupoid inside $B(H)$. Moreover, the C^* -subalgebra generated by the family is $*$ -isomorphic to the groupoid algebra generated by the graph groupoid of the corresponding graph. As application, we consider the C^* -subalgebras generated by a single operator. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
