

Buildings and Infrastructure Protection Series: Reference Manual to Mitigate Potential Terrorist Attacks Against Buildings (Fema-426 Bips-06 October 2011 Edition 2)

By Federal Emergency Management Agency U.S.

Createspace. Paperback. Book Condition: New. This item is printed on demand. Paperback. 510 pages. Dimensions: 10.9in. x 8.4in. x 1.2in. This manual, part of the new Building Infrastructure Protection Series published by the United States (U. S.) Department of Homeland Security (DHS) Science and Technology Directorate (S and T) Infrastructure Protection and Disaster Management Division (IDD), serves to advance high performance and integrated design for buildings and infrastructure. This manual was prepared as a component of the S and T program for infrastructure protection and disaster management; the overall goal of this program is to enhance the blast and chemical, biological, and radiological (CBR) resistance of our Nations buildings and infrastructure to meet specific performance requirements at the highest possible level. One of the objectives of this manual is to provide the tools and guidance to reduce physical damage to structural and nonstructural components of buildings and related infrastructure and to reduce resulting casualties caused by conventional bomb attacks and attacks using CBR agents. Although the material and the risk assessment methodology in this manual can be applied to most building types, it is intended to assist with the design and management of facilities in eight designated sectors outlined in...
