Books Express Publishing, United Kingdom, 2010. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Field Manual (FM) 3-60, The Targeting Process consists of five chapters and eight appendices to describe the Army's targeting process. Each chapter and appendix addresses how the decide, detect, deliver, and assess (D3A) methodology enhances the targeting process. The D3A is a methodology which optimizes the integration and synchronization of maneuver, fire support, and intelligence from task force to corps level operations. The D3A is described without tying it to specific hardware that will eventually become dated. The Army's targeting process consists of time tested techniques organized in a systematic framework. The FM 3-60 addresses how D3A methodology interfaces with the joint targeting cycle, military decisionmaking process (MDMP), and operations process. The joint targeting fundamental principles and doctrinal guidance are also presented in this publication. Successful targeting requires that the leadership team and their staff possess an understanding of the functions associated with the targeting process. The FM 3-60 builds on the collective knowledge, experience gained through recent operations, and numerous exercises. The manual is rooted in time tested principles and fundamentals, while accommodating force design, new technologies, and diverse threats to national security.
