## Glucocorticoid receptor-based transrepressive mechanisms

By Ilse Beck

LAP Lambert Acad. Publ. Mrz 2010, 2010. Taschenbuch. Book Condition: Neu. 220x150x9 mm.

Neuware - Inflammation is one of the biggest challenges in current medicine. Glucocorticoid-based therapy is still the most commonly used treatment to combat chronic and acute inflammation.

However, as this treatment is burdened with a detrimental side effect profile and the occurrence of glucocorticoid resistance, research efforts are focused on characterizing the anti-inflammatory mechanisms of glucocorticoids and developing new therapeutic strategies to fight inflammation. In this book, focus is put on the effects of the glucocorticoid receptor on NF- $\kappa$ B and NF- $\kappa$ B-driven gene expression. The transcription factor NF- $\kappa$ B is namely key to the onset and propagation of inflammation. Special attention is also given to the effects of glucocorticoids on the kinase MSK1 and the associated chromatin and NF- $\kappa$ B modulations. In a second chapter, we explore alternative glucocorticoid receptor function via the selective agonist Compound A. Further unravelling the underlying mechanism of how glucocorticoids mediate anti-inflammatory gene repression is a very important issue for molecular researchers, biochemists, medical doctors and specialists, pharmaceutical companies, and product managers. 152 pp. Englisch.

### Reviews

*If you need to adding benefit, a must buy book. It is packed with wisdom and knowledge I am just effortlessly could get a pleasure of reading a written publication.*

-- *Lea Legros V*

*A superior quality pdf along with the font used was intriguing to read through. It can be rally exciting throug reading through time period. You may like how the blogger create this book.*
