CRYPTOGRAPHY IN THE DATABASE: THE LAST LINE OF DEFENSE (PAPERBACK)

DOWNLOAD PDF

Pearson Education (US), United States, 2005. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Protect Your Enterprise Data with Rock-Solid Database Encryption If hackers compromise your critical information, the results can be catastrophic. You re under unprecedented pressure--from your customers, your partners, your stockholders, and now, the government--to keep your data secure. But what if hackers evade your sophisticated security mechanisms? When all else fails, you have one last powerful line of defense: database cryptography. In this book, a leading crypto expert at Symantec demonstrates exactly how to use encryption with your own enterprise databases and applications. Kevin Kenan presents a start-to-finish blueprint and execution plan for designing and building--or selecting and integrating--a complete database cryptosystem. Kenan systematically shows how to eliminate weaknesses, overcome pitfalls, and defend against attacks that can compromise data even if it s been protected by strong encryption. This book s 3,000 lines of downloadable code examples let you explore every component of a live database cryptosystem, including key vaults and managers, manifests, engines, and providers.This book s coverage includes * Understanding your legal obligations to protect data * Constructing a realistic database security threat model and ensuring that you address critical threats * Designing robust database cryptographic infrastructure around today s most effective security patterns * Hardening your database security requirements * Classifying the sensitivity of your data * Writing database applications that interact securely with your cryptosystem * Avoiding the common vulnerabilities that compromise database applications * Managing cryptographic projects in your enterprise database environment * Testing, deploying, defending, and decommissioning secure database applications Cryptography in the Database is an indispensable resource for every professional who must protect enterprise data: database architects, administrators, and developers; system and security analysts; and many others.
