CONSTRUCTION MATERIALS, FIFTH EDITION: THEIR NATURE AND BEHAVIOUR

CRC Press. Paperback. Condition: New. This established textbook provides an understanding of materials behaviour through knowledge of their chemical and physical structure. It covers the main classes of construction materials: metals, concrete, other ceramics (including bricks and masonry), polymers, fibre composites, bituminous materials, timber, and glass. It provides a clear and comprehensive perspective on the whole range of materials used in modern construction, to form a must-have for civil and structural engineering students, and those on courses such as architecture, surveying and construction. It begins with a Fundamentals section followed by a section on each of the major groups of materials. In this new edition: - Typical questions with answers to any numerical examples are given at the end of each section, as well as an instructors manual with further questions and answers. - Coverage of sustainability is markedly increased, to include the drivers for sustainable construction and eco-friendly buildings. - Links are given to free reports from The Concrete Centre, Corus, and others, as well as to material suppliers websites. - The masonry section is entirely overhauled and extended beyond the basics of load bearing masonry, and to include the flexi-arch and hollow core bricks used in mainland Europe for infill walls. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.
