It is well for the specialist to remember that in diagnosing gonorrhoea in the female he should see with his nose and fingers as well as with his eyes. Prognosis. The prognosis of urethritis in the female is usually more favorable than in the male. The chronic form is more easily treated, and the chances for recovery are, on account of the anatomy of the parts, considerably greater. TREATMENT. In acute urethritis accompanying vaginal gonorrhoea, or exposure to cold, or traumatism, a palliative treatment should be adopted. Hot vulvar and vaginal urethritis in the Female.--Runnells. 381 inal douches with warm sitz-baths should constitute the local treatment at the outset. If the gonorrhoeal disease in the female is recognized in its inception...
