

Microchip Methods in Diagnostics

Filesize: 9.74 MB

Reviews

Simply no terms to explain. I am quite late in start reading this one, but better then never. Its been written in an remarkably easy way and is particularly merely soon after i finished reading this book where basically changed me, affect the way i really believe.

Condition: New. Publisher/Verlag: Springer, Berlin | Microchip methods of analysis are now an essential tool for biomedical researchers. Here, the authors focus on DNA microarrays, protein microarrays, and labs-on-chips, and support the introduction of new diagnostic methods based on microtechnologies. | In this new age of science and technology, microchip methods of analysis have developed into an essential tool for biomedical researchers. Microchip Methods in Diagnostics looks at this increasingly miniaturized technology, focusing on DNA microarrays, protein microarrays, and labs-on-chips, and supporting the introduction of new diagnostic methods based on microtechnologies. The work provides a background on the technological aspects of each of these methods, followed by chapters describing the methods with regard to specific applications. Since it uses only those processes which have reached a certain level of maturation, this volume is able to provide approaches that are applicable in practice even by the non-expert. Composed in the highly successful Methods in Molecular Biology series format, each chapter contains a brief introduction, step-by-step methods, a list of necessary materials, and a Notes section which shares tips on troubleshooting and avoiding known pitfalls. An innovative and cutting-edge work, Microchip Methods in Diagnostics strives to bring the technology of microchips even further into the world of diagnostics, predicting incredible benefits for patients in the years to come. | Microchip Methods in Diagnostics Ursula Bilitewski, ed. Table of contents Preface Contributors 1. DNA-Microarrays: An Introduction to the Technology Ursula Bilitewski 2. Discussion of the Applicability of Microarrays: Profiling of Leukemias Torsten Haferlach, Ulrike Bacher, Alexander Kohlmann, Claudia Haferlach 3. Expression Profiling Using Affymetrix GeneChip Microarrays Herbert Auer, David L. Newsom and Karl Kornacker 4. Genotyping of mutation in the beta-globin gene using DNA microarrays Martin Dufva and Lena Poulsen 5. Antibody-based Microarrays Christer Wingren and Carl A.K. Borrebaeck 6. Application of Protein ArrayTubes...
