By John J. Quinn

AuthorHouse. Paperback. Condition: New. 160 pages. Dimensions: 8.8in. x 5.5in. x 0.6in. Why read this book on Environmental Stress Screening If you are working in the electronic manufacturing industry and you have heard the questions : Why did it fail in the field and not in the factory The answer to this question is there was not a proper ESS program developed for this product. A good ESS program is develop from the ground up and the fallout data is tracked. The fallout data is used to alter the present ESS program. This new altered program is tailored to the hardware and usually is less costly and should improve the product reliability. Why cant we use the same ESS program as the other guy The answer to this is you can, if you are manufacturing the exact same product. If this is the case, you must be working with the other guy. A different product requires a different ESS program. Or If you are working in the electronic manufacturing industry and you have heard the statements : I wont do ESS, its going to cost too much. Can you put a price on field returns or lost contracts because of poor...
