

## Subsonic and Transonic Wind Tunnel

Filesize: 9.46 MB

### ***Reviews***

*Completely among the finest ebook We have ever go through. I really could comprehended every little thing using this created e pdf. I am pleased to let you know that this is actually the greatest ebook i actually have read through inside my own daily life and might be he very best ebook for ever.*

## SUBSONIC AND TRANSONIC WIND TUNNEL

[DOWNLOAD PDF](#)

Betascript Publishing. Taschenbuch. Condition: Neu. Neuware - Low speed wind tunnels are used for operations at very low mach number, with speeds in the test section up to 400 km/h (~ 100 m/s,  $M = 0.3$ ). They are of open-return type (see figure below), or return flow (see figure below). The air is moved with a propulsion system made of a large axial fan that increases the dynamic pressure to overcome the viscous losses. High subsonic wind tunnels (0.4  $M$  0.75) or transonic wind tunnels (0.75  $M$  1.2) are designed on the same principles as the subsonic wind tunnels. Transonic wind tunnels are able to achieve speeds close to the speeds of sound. The highest speed is reached in the test section. The Mach number is approximately one with combined subsonic and supersonic flow regions. Testing at transonic speeds presents additional problems, mainly due to the reflection of the shock waves from the walls of the test section (see figure below or enlarge the thumb picture at the right). 88 pp. Englisch.
