Organization for Economic Co-operation and Development (OECD), France, 2012. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.The future of Greece s well-being will depend on improving educational performance to boost productivity and improve social outcomes. In the current economic context, with the need to get best value for spending, Greece must and can address inefficiencies in its education system. The challenges are significant. For example, Greece lags behind many OECD countries in performance on PISA, including countries with the same or lower levels of expenditure per student as well as countries with the same and lower levels of economic development. Salary costs per student are above the OECD average, mostly because Greek teachers have less teaching time and Greece has smaller classes. A smaller percentage of students who enter tertiary education complete a first degree within the statutory study time than in any other country in Europe. To address the challenges, the Greek government has established a bold agenda and sought advice from a task force on the development and implementation of reform proposals that reflect best practices in OECD countries. This report provides the outcomes of the work of the task force. It presents a roadmap for how the reforms can be successfully implemented, with pointers to relevant experience in other countries. As a contribution to the on-going policy discussions in Greece, it recommends specific short-, medium- and long-term actions that can improve efficiency in the country s education system. Further Reading: Creating Effective Teaching and Learning Environments: First Results from TALIS (2009); Strong Performers and Successful Reformers in Education: Lessons from PISA for the United States (2010); PISA 2009 Results: What Students Know and Can Do: Student Performance in Reading, Mathematics and Science (Volume I) (2010).
