

Imperial Japanese Navy Aircraft Carriers, 1921-45

By Mark Stille, Tony Bryan

Osprey Publishing. Paperback. Book Condition: new. BRAND NEW, Imperial Japanese Navy Aircraft Carriers, 1921-45, Mark Stille, Tony Bryan, The Imperial Japanese Navy was a pioneer in naval aviation, having commissioned the world's first built-from-the-keel-up carrier, the 'Hosho'. Throughout the 1920s and 1930s, it experimented with its carriers, perfecting their design and construction. As result, by the time Japan entered World War 2 and attacked the United States at Pearl Harbor in 1941, it possessed a fantastically effective naval aviation force. Carriers would roam the Pacific with near impunity, destroying their opponents at will. This book covers the design, development and operation of IJN aircraft carriers built prior to and during World War 2. Pearl Harbor, Midway and the first carrier vs carrier battle, the battle of the Coral Sea, are all discussed.

This book may be worth purchasing. It typically fails to expense excessive. It is extremely difficult to leave it before concluding, once you begin to read the book.
