Reviews

This type of publication is almost everything and helped me looking forward and much more. I am quite late in start reading this one, but better then never. You wont really feel monotony at whenever you want of your own time (that's what catalogs are for relating to if you ask me).

THE COMPREHENSIVE HANDBOOK OF CONSTRUCTIVIST TEACHING: FROM THEORY TO PRACTICE (PAPERBACK)

Information Age Publishing, United States, 2010. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.While many people talk about the Constructivist philosophy, there has not been a publication that provides a detailed description of what a Constructivist classroom sounds like and looks like. This book fills that void by examining the philosophy, translating it into teaching strategies, and providing over forty examples. These examples come from the elementary level up to and including the collegiate level, and include all content areas. These examples show how the Constructivist educator uses the linguistic mode, the visual mode, and the kinesthetic mode to create a class environment in which the Constructivist philosophy flourishes. Examples of student work are provided; the book also includes chapters on note-taking, Problem-Based Learning (PBL), action research, and other Constructivist resources. Written in user-friendly form, this book presents a concrete and step by step approach for translating the Constructivist philosophy into classroom practice. This book is intended for every Constructivist researcher, practitioner, and teacher-educator. The researcher and teacher-educator will benefit from topics such as the history of Constructivist thought, the principles of Constructivism and action research. This book is more than a list of recipes, and this will be beneficial to the practitioner. Starting with the principles of Constructivism, and bridging to four basic teaching strategies, the practitioner is guided on how to use different learning modes and meta-strategies to create a true Constructivist practice. An educator s life is made up of one s philosophy, teaching principles, daily strategies, resources, and research tools. This book provides an in-depth look, from the Constructivist perspective, at each one of these components. In every sense of the word, this book is truly comprehensive.
