paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Paperback. Pages Number: 0 Publisher: China Electric Power Press Pub. Date: 2009-10-01 This book is the automation program design and project examples Series one. This book single-chip technology from a practical point of view. the content is divided into three parts. The first part (Chapter 1): detail of the MCS-51 series MCU s basic structure and working principle. instruction. work. clock and timing. reset and reset operation. low-power mode. the software development language. etc.; The second part (Chapter 2 ~ Chapter 11): 10 typical cases by design. will help readers to quickly start and practice; Part III (Appendix A-Appendix C): brief introduction to the Keil C51 and Proteus simulation software use method. and gives eight topics related to curriculum design for the selection and reference. This book comes with a CD. Including schematics and source code for all examples. as well as Protel. Keil C51. Proteus and IAR video teaching. This book mainly for the MCS-51 system for beginners. previously used assembly language for microcontroller development system and now want to convert to the C51. the reader. while for tertiary electronic. mechanical. automatic control and other students to learn microcontroller Reference materials can also be as engaged in industrial automation. mechatronics. and related professional engineering and technical staff reference. Contents: Series Preface Chapter 1 Introduction sequence 1.1 1.2 typical single-chip microcontroller Brief Introduction 1.3 MCS-51 microcontroller clock and timing 1.4 MCS-51 microcontroller reset and reset the working process of the microcontroller 1.5 1.6 1.7 low-power single-chip work 1.8 Summary of software development languages ??in Chapter 2 digital temperature controller design task design 2.1 2.3 2.2 Overall System Design 2.4 System hardware circuit design program based Four Satisfaction guaranteed, or money back.
