Lbe Press Publishing, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. AI practitioner and noted AI Insider thought leader, Dr. Lance Eliot, MBA, PhD, provides ground breaking work on the emergence of AI Guardian Angel Bots. Dr. Eliot points out that with the advent of Deep AI and Machine Learning, there is both great promise and potential peril for consumers. Will people trust their self-driving cars and other smart devices as the Internet of Things (IoT) takes hold? Should they trust these Deep AI enabled systems? One means to bolster trust in Deep AI is to have consumers protect themselves and their safety by making use of AI Guardian Angel Bots. These new Bots are intended to monitor and potentially guide a Deep AI system that the consumer is dependent on. Your AI Guardian Angel Bot will be your guardian or protector when being driven by a self-driving car, and in any other situation that entails a dependency on Deep AI and Machine Learning. Readable by those interested in the latest in AI, this book is intended for business leaders, technology experts, and anyone with an interest in getting an edge on safety in the AI burgeoning world that we live in.
