Visit us online at - - An American Robinson Crusoe is the outcome of many years of experience with the story in the early grades of elementary schools. It was written to be used as a content in giving a knowledge of the beginning and development of human progress. The aim is not just to furnish an interesting narrative, but one that is true to the course of human development and the scientific and geographical facts of the island on which Robinson is supposed to have lived. The excuse for departing so widely from the original story is to be found in the use which was desired to be made of it. The story here presented is simply the free adaptation of the original narrative to the demand for a specific kind of content in a form which would be interesting to the children.
