## Bulletin - Geological Survey Volume 33

By Mining Georgia Dept of Mines

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1918 edition. Excerpt: .shearing, all illustrative of what has happened to the formation on a larger scale. The general schistosity strikes N. 45 E., and dips 45-50 SE., corresponding with the gray schist forming the country rock of this region. Exposures of these types are common along the deeply eroded trench of Raccoon Creek. The rocks probably belong to the metamorphosed Paleozoic formations whose eastern border is marked by the pyrite belt as indicated by numerous prospects along the apparently continuous ore lead, from the Tallapoosa mine in northeastern Haralson County to the Rush-Banks prospect in western Paulding County. As the shafts and drifts have been for some time under water, it has been necessary to seek information regarding the extent of the ore body and the character of the ore from reports made in former years.1 The pyrite deposit outcropping on this property is in two...
