Bibliogov, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.NCES asked the National Institute of Statistical Sciences (NISS) to convene a technical panel of survey and policy experts to examine potential strategies for configuration and data integration among successive national longitudinal education surveys. In particular the technical panel was asked to address two related issues: how could NCES configure the timing of its longitudinal studies (e.g., Early Childhood Longitudinal Study [ECLS], Education Longitudinal Study [ELS], and High School Longitudinal Study [HLSL]) in a maximally efficient and informative manner. The main, but not sole, focus was at the primary and secondary levels; and what could NCES do to support data integration for statistical and policy analyses that cross breakpoints between longitudinal studies. The NISS technical panel delivered its report to NCES in 2009. The principle recommendations included in the report are: 1. The technical panel recommended that NCES should configure K-12 studies as a series of three studies: (i) a K-5 study, followed immediately by (ii) a 6-8 study, followed immediately by (iii) a 9-12 study. One round of such studies, ignoring postsecondary follow-up to the 9-12 study, requires 13 years to complete. 2. The technical panel also recommended that budget permitting; NCES should initiate a new round of K-12 studies every 10 years. This can be done in a way that minimizes the number of years in which multiple major assessments occur. The panel found that there is no universal strategy by means of which NCES can institutionalize data integration across studies. One strategy was examined in detail: continuation of students from one study to the next. Based on experiments conducted by NISS the technical panel found that: 3. the case for continuation on the basis that...
