LIFE-TIME ESTIMATION OF MODERN POWER ELECTRONICS DEVICES

Condition: New. Publisher/Verlag: Noor Publishing | Power cycling capability of advanced packaging and interconnection technologies at high temperature swings | Due to the increasing advancements in power devices, especially in Insulated Gate Bipolar Transistors (IGBT) technology, switching of kV and kA within mis is possible. Thereby a dissipation power up to 400W per chip is generated. Compared to the switched power, the dissipated power is still marginal. However, considering the area within this power is generated (2cm²), a significant...

A brand new e book with a brand new standpoint. I have read through and that i am certain that i am going to gonna go through again once more in the future. Its been developed in an remarkably simple way in fact it is merely right after i finished reading through this book in which basically modified me, modify the way in my opinion.
