The Bering Strait Crossing is the epic story of the Intercontinental Divide. The ancient waterway - when the fog clears over the Diomed Islands - is among the world's most stunning vistas. This is where the 53-mile wide strait, named for Danish explorer Vitus Bering (1681-1741), separates four continents across the Europe-Asia landmass and the Americas. Extremes of climate, isolation, and geopolitical tension have interfaced to create the perception of a frozen limbo at the edge of the world. Yet the Bering Strait is the world's geographical crossroads - linking East with West - for nowhere else on the globe is it possible to cross the Pacific Rim between Asia and the Americas. In the modern era, various schemes have been proposed - rail, ferry, tunnel - by which to cross the strait. Since the end of the Cold War, a scheduled air service has been in place. The strait remains undefeated in terms of a terrestrial link between the USA and Russia - so far. The author uncovers a world-shaping revelation: that the Bering Strait has the potential to become a global shipping nexus via the Northwest Passage and the Northern Sea Route between Europe, North America, and Asia. In the early 21st century, the self-induced amnesia of the long Cold War years is yielding to a fresh outlook between East and West across the strait. In a world thirsty for energy resources and trade, the prospect for US-Russian cooperation across the northern Pacific Rim is tantalising in its multiplicity - and vastness - with profound implications for the global economy. James A. Oliver blends geography, exploration and international relations to recount...
