AGRO CLIMATIC ANALYSIS USING WATER BALANCE

LAP Lambert Academic Publishing Sep 2014, 2014. Taschenbuch. Condition: Neu. Neuware - Water balance is one of the techniques in modern climatic and hydrological studies, in which the climatic elements such as solar radiation, temperature and rainfall are used to evaluate various hydrological elements namely water need, water supply, soil moisture storage, water surplus and water deficit of a region. These water balance elements enable to evaluate a proper agricultural planning of that area. In addition, water balance is a...
