Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from On the Genus Arenaria, Linn Linnaeus enumerated 25 species, of which 11 occur in the first edition of Species Plantarum. As Godron long ago pointed out, if Lychnis is to be considered as a genus distinct from Silene, then Alsine should be considered as distinct from Arenaria; as in each case a primary differential character is the number of the teeth of the capsule in relation with the number of the styles. The presence of a strophiole at the hilum of the seed is a constant character, and important enough to exclude a number of species included by some authors in Mwhringia; though this differential character is not mentioned in the Linnean diagnosis of the genus. Most of the other proposed genera frequently included under Arenaria, in its comprehensive sense, are best considered as primary subdivisions of Alsine. The genus Arenaria, in this paper, is defined more in accordance with Fenzl's circumscription of the admitted species, and as propounded by him in Endlicher's Genera Plantarum.
