

## Recent Advances in Intelligent Control Systems

Filesize: 4.17 MB

### **Reviews**

*Comprehensive information! Its this sort of excellent read. I could possibly comprehend every little thing out of this published e pdf. You wont sense monotony at at any moment of your time (that's what catalogs are for about when you ask me).*  
**(Prof. Mauricio Howe III)**

## RECENT ADVANCES IN INTELLIGENT CONTROL SYSTEMS

[DOWNLOAD](#)

Condition: New. Publisher/Verlag: Springer, Berlin | This text takes the state-of-the-art in intelligent control systems and presents it according to four categories: fuzzy control; neural control; fuzzy neural control; and intelligent control. It includes a variety of design examples. | "Recent Advances in Intelligent Control Systems" gathers contributions from workers around the world and presents them in four categories according to the style of control employed: fuzzy control; neural control; fuzzy neural control; and intelligent control. The contributions illustrate the interdisciplinary antecedents of intelligent control and contrast its results with those of more traditional control methods. A variety of design examples, drawn primarily from robotics and mechatronics but also representing process and production engineering, large civil structures, network flows, and others, provide instances of the application of computational intelligence for control. Presenting state-of-the-art research, this collection will be of benefit to researchers in automatic control, automation, computer science (especially artificial intelligence) and mechatronics while graduate students and practicing control engineers working with intelligent systems will find it a good source of study material. | Fuzzy Control.- Fuzzy Control of Large Civil Structures Subjected to Natural Hazards.- Approaches to Robust ?? Controller Synthesis of Nonlinear Discrete-time-delay Systems via Takagi-Sugeno Fuzzy Models.- ?? Fuzzy Control for Systems with Repeated Scalar Nonlinearities.- Stable Adaptive Compensation with Fuzzy Cerebellar Model Articulation Controller for Overhead Cranes.- Neural Control.- Estimation and Control of Nonlinear Discrete-time Systems.- Neural Networks Based Probability Density Function Control for Stochastic Systems.- Hybrid Differential Neural Network Identifier for Partially Uncertain Hybrid Systems.- Real-time Motion Planning of Kinematically Redundant Manipulators Using Recurrent Neural Networks.- Adaptive Neural Control of Uncertain Multi-variable Nonlinear Systems with Saturation and Dead-zone.- Fuzzy Neural Control.- An Online Self-constructing Fuzzy Neural Network with Restrictive Growth.- Nonlinear System Control Using Functional-link-based Neuro-fuzzy Networks.- An Adaptive Neuro-fuzzy Controller for Robot Navigation.- Intelligent Control.-...
