Oxford University Press Inc, United States, 2004. Paperback. Condition: New. Language: English . Brand New Book. Here is a lively history of modern physics, as seen through the lives of thirty men and women from the pantheon of physics. William H. Cropper vividly portrays the life and accomplishments of such giants as Galileo and Isaac Newton, Marie Curie and Ernest Rutherford and Albert Einstein, right up to contemporary figures such as Richard Feynman, Murray Gell-Mann, and Stephen Hawking. We meet scientists, all geniuses, who could be gregarious, aloof, unpretentious, friendly, dogged, imperious, generous to colleagues, or contentious rivals. Cropper also offers vivid portraits of their great moments of discovery, their bitter feuds, their relations with family and friends, their religious beliefs and education. In addition, since scientists in a particular field often inspire those who follow, Cropper has grouped these biographies by discipline mechanics, thermodynamics, particle physics, and so on each section beginning with a historical overview. Marie Curie and Ernest Our understanding of the physical world has increased dramatically in the last four centuries, starting with Galileo and his telescope and stretching to Stephen Hawking s work on black holes and cosmology. With Great Physicists, readers can retrace the footsteps of the men and women who led the way. t Rutherford and Albert.
