

## The Etiology, Pathology, and Treatment of Intestinal Fistula and Artificial Anus (Classic Reprint) (Paperback)

By Nicholas Senn

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from The Etiology, Pathology, and Treatment of Intestinal Fistula and Artificial Anus Foreign Bodies. - Perforation of the intestinal wall by a foreign body, preceded by a circumscribed plastic peritonitis, frequently results in the formation of an abscess, which, when it reaches the surface or an adjacent hollow organ, is followed by an intestinal fistula. Small, slender foreign bodies, such as needles, pins, and fish bones, Often perforate the intestinal wall and find their way to the surface or into neighboring organs without giving rise to an intestinal fistula. In one case I removed four fish bones from a small abscess in the median line below the umbilicus, after which the abscess healed promptly and permanently. The foreign bodies which are most frequently found in abscesses preceding intestinal fistula are sharp fragments of bone, gall stones, and enteroliths. Malignant Tumors - Malignant tumors may cause intestinal fistula either by producing obstruction followed by distention and ulceration on the proximal side, or by directly implicating the intestinal wall. The latter mode of origin is the most common. The malignant tumor in such instances...
