

Exploring Space, Exploring Earth New Understanding of the Earth from Space Research

By Paul D. Lowman Jr

Cambridge University Press. Hardcover. Book Condition: New. Hardcover. 382 pages. Dimensions: 9.9in. x 7.1in. x 0.9in. This book describes the impact of space flight on geology and geophysics, beginning with a foreword by Neil Armstrong, which illustrates how the exploration of space has led us to a far deeper understanding of our own planet. Direct results from Earth-orbital missions include studies of Earth's gravity and magnetic fields. In contrast, the recognition of the economic and biological significance of impact craters on Earth is an indirect consequence of the study of the geology of other planets. The final chapter presents a new theory for the tectonic evolution of the Earth based on comparative planetology and the Gaia concept. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Hardcover.
