Trying to uncover a deeper meaning in spiritual ancient texts such as The Ten Commandments has led many scholars on an adventure of the soul and mind; after meeting at Paris Sorbonne University more than thirty years ago, authors Seraya and Haldane (Angel Signs, 2002) undertook such a quest. In their new book they use their vast collective expertise -philosophy, metaphysics, linguistics, science, archeology- to craft a captivating story tracing a linear thread from The Ten Commandments across all belief systems. By sojourning through history and to other galaxies via space-time travel their adventure leads them to a plateau of greater understanding of humankind. Meeting up with great philosophical minds such as Moses, Lao Tzu, Buddha, Benjamin Franklin and many others, they receive guidance to decipher the true nature and meaning of The Ten Commandments, uncovering a complex series of coded messages in the text that could change the meaning of life and life-after-life, as we understand it. Although the basis of the authors overarching theories is scholarly in nature the writing is accessible. . . it makes for a smooth read.
