Power Trip: From Oil Wells to Solar Cells - Our Ride to the Renewable Future (Paperback)

By Amanda Little

HarperCollins Publishers, United Kingdom, 2008. Paperback. Condition: New. Language: N/A. Brand New Book. In this fresh and gutsy analysis, Amanda Griscom Little lays bare America's energy past, present and future and shows how the innovative designs that got it to its current energy crisis will actually save it from ruin. In this smart, fluent and easy-to-read narrative, Little delivers a confident and constructive narrative that promises to move America, (and therefore the rest of the world) beyond the despair and the doom and gloom that has been plaguing our news stories and the media. Little takes us on a trip through the past, present and future of our energy landscape, clearly demonstrating how America's energy consumption first began. Every step of its astronomical rise is set out - from Thomas Edison's light bulb discovery in the early 1800s to Roosevelt's Faustian deal with Ibn Saud which was to turn oil from a commodity into the single most powerful political, military and economic catalyst of the world. As she reveals the staggering facts, oil's gargantuan influence on our everyday lives becomes clear. Without it we are nothing, and yet somehow we have allowed it to instruct every...
