Date :2010-03- 01. This book is based on the design of the national survey of registered engineers Commission issued a registered professional electrical engineer qualification-based syllabus. written review reference. Covers the outline by all the requirements that the circuit of the basic concepts of circuit analysis. sinusoidal currents. non-sinusoidal currents. the dynamic circuit time-domain analysis of electrostatic field. a constant electric field. uniform transmission line. the semiconductor basic principles . amplifier. operational amplifiers. signal processing circuitry. signal circuits. power amplifier. DC power supply. basic knowledge of digital circuits. integrated logic gates. sequential logic circuits. digital-analog and analog-digital conversion. basic knowledge of power systems. system parameters and equivalent circuit. power flow calculation. reactive power balance and voltage regulation. short-circuit current calculations. transformers. induction motors. synchronous motor. overvoltage and insulation coordination. circuit breakers. transformers. DC motors. electrical main wiring . electrical equipment selection. The book is divided into four parts. each part of the syllabus requirements are provided. review the content. simulation exercises and exercise answers. This book is intended to participate in registered electrical engineer qualification examination examination examination based staff. but also the professional staff of the relevant reference. Contents: 10 test circuit and electromagnetic outline of the content of 10.1 circuit review the basic concepts and fundamental laws of ideal circuit elements 10.1.2 10.1.1 current. voltage reference direction of the Kirchhoff s law 10.1.3 10.2 10.2.1 Circuit analysis methods commonly used 10.2.2 Equivalent circuit transformation method to write the node equations of the column method and its solution circuit loop equation 10.2.3 column writing method 10.2.4 superposition theorem. Thevenin and Norton theorems Theorem 10.3 10.3.1 sinusoidal sinusoidal current circuit capacity of the three...
