

Design & Analysis Of Grid Connected Photovoltaic System

By Muhammad, Sulaman

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Photovoltaic: Eco friendly power | Continues supply of power is the top most priority of Engineers all over the world. But due to increasing in population and decrease in natural resources, now its Going to be Hard for engineers to generate electricity through typical ways, that's why they are looking toward Solar System for generation of Electricity. Photovoltaics are best known as a method for generating electric power by using solar cells to convert energy from the sun into a flow of electrons. Sun is an endless source of power, 89 PW of sunlight reaching the Earth's surface which is 6000 times more then the power generated by humans. This project is about generation of power through solar system and its synchronization with grid. | Format: Paperback | Language/Sprache: english | 68 pp.

Reviews

This created book is wonderful. It is amongst the most amazing book i have got go through. I am just effortlessly will get a enjoyment of looking at a created publication.

-- Prof. Jasper Murazik PhD

Simply no terms to explain. I am quite late in start reading this one, but better then never. Its been written in an remarkably easy way and is particularly merely soon after i finished reading this book where basically changed me, affect the way i really believe. -- Prof. Jedediah Kuhic DVM
