Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1862 Excerpt: . divided concentrically with the sun, and a scale of minutes and seconds of arc etched, starting from the sun s limb, by which means the prominences were referred to the sun s centre, and their angles of position and heights above his periphery could be read off with a fair degree of accuracy. In the three Plates, XIII., XIV. and XV., a wrong correction was, however, applied for the errors of the wires in determining the zero of the angular divisions, namely +23 for both totality pictures, instead of +15 -5 for the first totality picture and +16 5 for the second; so that in taking angles of position of the prominences, the readings on Plate XIII. must be corrected by applying the number--7 -5; those on Plate XIV. by applying the correction--6 .5, and those on Plate XV. by applying--7 -0. Moreover, a small error in determining the centre in Plate XIV. also interferes with the absolute correctness of the position-angles and of the heights of the prominences above the moon s periphery. Subsequently to this being etched, I discovered the fact that the centre should have been placed about 5 of linear space nearer 270, in a direction from 90 to that point, and 4 nearer 360. The angular positions of some of the principal prominences, determined by measurement of the original negatives, will be hereinafter given, so that no difficulty will be experienced in correcting the position of the other prominences as...
