Taylor Francis Ltd, United Kingdom, 2017. Paperback. Condition: New. Language: English . Brand New Book. World-systems analyses have recast the study of between- and within-nation country inequality as constituent aspects of a single field of inquiry: the study of inequality and social stratification as processes that always have been global in their very essence. World-systems analyses maintain that global social stratification pivots around institutional arrangements that render distributional outcomes as simultaneously national, gendered, racialized and global processes. This book takes stock of some of the enduring theoretical and empirical contributions of a world-systems perspective, and identifies promising directions for future inquiry and discussion. Some chapters reassess the scope and methodologies of world-system analysis around several key problems (e.g., the spatial and temporal boundaries of global commodity chains; the construction and challenge of various dimensions of social inequality; systemic and anti-systemic social movements). Others take stock of areas in which world-system are promoting methodological innovation and/or generating useful global data, and identify questions that demand additional methodological and empirical attention for future research. In different ways, this book help us to critically reconsider some of the enduring legacies within a world-systems perspective (such as Karl Polanyi s concept of the double movement, or the distinction drawn by Giovanni Arrighi or Immanuel Wallerstein between systemic and antisystemic movements). As argued by many of the authors in this book, a world-historical approach calls for greater sensitivity to the manifold ways in which conceptual boundaries change over time and space. Taking seriously the issue of unit of analysis, this book explores critically productive ways for better understanding global patterns of continuity and change.
