## ROUGH SETS AND CURRENT TRENDS IN COMPUTING : 7TH INTERNATIONAL CONFERENCE, RSCTC 2010, WARSAW, POLAND, JUNE 28-30, 2010 PROCEEDINGS

DOWNLOAD

Springer-Verlag GmbH Jun 2010, 2010. Taschenbuch. Condition: Neu. Neuware - This volume contains the papers selected for presentation at the 7th International Conference on Rough Sets and Current Trends in Computing (RSCTC 2010) held at the University of Warsaw, Poland, during June 28-30, 2010. This was the seventh edition of the event that has established itself as the main forum for exchange of ideas between researchers in various areas related to rough sets. In 2010, the conference went back to its origins both in terms of its location (the first RSCTC conference was held in Warsaw, Poland in 1998) and in terms of topic coverage. The dates also mark the third anniversary of RSEISP 2007 a conference dedicated to the memory of Zdzisław Pawlak. RSCTC 2010 was to provide researchers and practitioners interested in emerging information technologies a forum to share innovative theories, methodologies, and applications in rough sets and its extensions. In keeping with the spirit of past rough set-based conferences, RSCTC 2010 aimed to explore synergies with other closely related areas such as computational intelligence, knowledge discovery from databases and data mining, non-conventional models of computation, and Web mining. Major topics covered in these proceedings include: approximate and uncertain reasoning, bioinformatics, data and text mining, dominance-based rough set approaches, evolutionary computing, fuzzy set theory and applications, logical and mathematical foundations of rough sets, perceptual systems as well as applications of rough sets and its extensions in areas such as medicine, Web intelligence and image processing. The papers included in the special and industrial sessions cover learning methods and mining of complex data, soft computing applications to multimedia and telemedicine, knowledge representation and exchange in multi-agent systems and emerging intelligent technologies in the telecommunications industry. There were 148 valid (out of 163 in total) submissions to RSCTC 2010. Every paper was examined by at least two reviewers. Out of the papers initially selected, some were approved subject to revision and then additionally evaluated. 771 pp. Englisch.
