Reviews

This is the greatest book i have got read through till now. I could possibly comprehended almost everything out of this published e book. Your daily life span will probably be enhance the instant you total looking at this book.
(Bernadette Baumbach)

GREEN GROWTH IN CEBU, PHILIPPINES (PAPERBACK)

Organization for Economic Co-Operation Development, United States, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Urban green growth policies encourage economic development while reducing negative environmental externalities and the consumption of natural resources and environmental assets. This report is the fourth case study in the OECD Urban Green Growth in Dynamic Asia project. It explores policies and governance systems to promote green growth in Metro Cebu, Philippines, and provides recommendations for enhancing Cebu s green growth potential. Metro Cebu is the second most populated urban area of the Philippines after Metro Manila. Its economic growth has been impressive. However, it faces many challenges that hinder its sustainable growth in areas such as land use and the provision of basic urban services - transportation, energy, solid waste, and water security. Ongoing development offers numerous opportunities for the metro area to shift towards the cleaner sustainable model which the concept of green growth offers.
