A Beginners Guide to Programming Interactive Web Applications with PHP and MySQL Have you ever wanted to design your own website or browser application but thought it would be too difficult or just didnt know where to start Have you found the amount of information on the Internet either too daunting or not geared for your skill set or worse-- just plain boring Are you interested in learning to program PHP and have some fun along the way If so, then The Joy of PHP by Alan Forbes is the book for you!! Alan starts with some basic HTML so the absolute beginner can catch up quickly and then goes step by step on how PHP works. You start with the easy stuff--like how to create and run simple PHP scripts that modify web pages-- and then build on what youve learned through a series of cohesive (and fun) exercises that carry over from lesson to lesson. As the chapters progress you begin to build a web site for a growing used car dealership business. This approach keeps the material fun and challenging-- and gives what youve learned a context to be relevant. A car dealership needs a constantly changing web site because the inventory of cars is always changing. HTML is not the answer for this kind of web site-- but PHP and MySQL are! Throughout the book you will be working with the web site for the car dealership and adding features and modifying it as the needs of the business (and your knowledge) grow. This writing style reinforces the previous lessons and keeps you engaged in a real project -- giving you both a sense of accomplishment and an opportunity...
