

## Bias and Precision of the Barr and Stroud Dendrometer Under Field Conditions (Classic Reprint) (Paperback)

By James Earl Brickell

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from Bias and Precision of the Barr and Stroud Dendrometer Under Field Conditions Direct measurements of tree volume are usually obtained by measuring felled trees. Many foresters are reluctant to fell trees that may not be utilized, especially valuable species or crop trees under rotation age (winters In addition to the loss of volume and growing stock, leaving felled trees provides breeding places for certain insects and increases fire hazard in the forest. Also, trees measured may not be the property of the party or agency conducting the survey. In other cases, such trees might be located on permanent sample plots that cannot be destroyed.
