Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Child Management The health, happiness, and efficiency of the adult man and woman depend, to a very large extent, upon the type of habits they acquire from their training and experience during early life. Any information which gives the interested parent a better idea of the mental life of the child, methods that may be utilized in developing desirable habits, and suggestions for overcoming undesirable habits may be considered well worth while. Habit is such a common, everyday sort of term, with which everyone is more or less familiar, that it hardly seems necessary to discuss it at all. However, it is in this very fact - that habits are so commonplace and ordinary in the minds of the great mass of individuals - that the danger lies. All too frequently the fundamental importance of forming right habits in early life is minimized or overlooked altogether. Without any attempt to give a strictly scientific definition, it may be said that habit is the tendency to repeat what has been done before. One develops not only habits of acting but habits of thinking and feeling in certain ways. Habits in regard to the care of the body - eating, sleeping, eliminating, bathing - are easily formed and vitally affect health. Our manners are a collection of habits; we do a rude or a courteous thing almost without stopping to think. If we did not learn the muscular movements which become habitual through repetition we could never play the piano, run a typewriter, or gain skill in athletics. Of course, children must learn the simpler motions first - the use of knife and fork, the buttoning of buttons, and...
