## The Planner's Guide to Natural Resource Conservation:

By Esparza, Adrian X. / McPherson, Guy

Condition: New. Publisher/Verlag: Springer, Berlin | The Science of Land Development Beyond the Metropolitan Fringe | This guide provides readers from diverse, nonscientific backgrounds with a working knowledge of how and why exurbanization impacts environmental systems. It includes relevant concepts and processes, and the know-how to apply science to land-use decisions. | Much of the country's recent population growth is situated in exurban areas. By many accounts exurbanization has become the dominant pattern of land development in the country and there is no indication it will slow in the foreseeable future (Theobald 2005; Brown et al. 2005; Glennon and Kretser 2005). By definition, exurban development takes place beyond the metropolitan fringe, often in rural and remote areas. The development of new exurban communities is a growing trend, especially in the West. In this case, developers and homebuilders seek large tracts of land, up to thousands of acres, in rural areas (typically within 50 miles of a large city) where they plan entire communities consisting of commercial, retail and residential land uses. Recreational amenities such as golf courses and hiking/biking trails are often included in these master-planned developments. Our philosophy is reflected in the book's two objectives. First, we seek to document...
