

On Wings of Faith and Reason: The Christian Difference in Culture and Science (Paperback)

By -

The Institute for the Psychological Sciences Press, United States, 2008. Paperback. Condition: New. New. Language: English . Brand New Book. The distinctive contribution that Christianity makes to investigations of culture and science is that of a coherent vision of truth - a unifying truth that takes flight on the two wings of faith and reason. Against methodological reductionism, philosophical nihilism, and postmodern skepticism, such a vision affirms that the unity of truth is ultimate and personal and that science and culture participate therein according to their own geniuses. On Wings of Faith and Reason provides reasons for a unified vision of truth, while giving examples of the roles that faith and reason play in scientific activities and cultural expressions. Contributing authors from the fields of medicine, ethics, philosophy, and theology argue that Christianity makes a difference, not only in providing an understanding of the ultimate origin and end of the human person, but in contributing to practical applications. Christianity offers assurance about the course of scientific and cultural inquiry, while encouraging creative expression and personal excellence in its execution. Against fideists, it is argued that reason has a differentiated role to play in Christian efforts and theological investigations. Against rationalists, it...
