

Burning Plasma: Bringing a Star to Earth

Filesize: 4.76 MB

Reviews

Good electronic book and valuable one. It generally is not going to charge an excessive amount of. Its been developed in an remarkably straightforward way and is particularly simply following i finished reading this ebook through which really transformed me, change the way i think.

(Mr. Domenic Eichmann)

BURNING PLASMA: BRINGING A STAR TO EARTH

National Academies Press. Paperback. Book Condition: new. BRAND NEW, Burning Plasma: Bringing a Star to Earth, Burning Plasma Assessment Committee, Plasma Science Committee, Board on Physics and Astronomy, Division on Engineering and Physical Sciences, National Research Council, Significant advances have been made in fusion science, and a point has been reached when we need to decide if the United States is ready to begin a burning plasma experiment. A burning plasma-in which at least 50 percent of the energy to drive the fusion reaction is generated internally-is an essential step to reach the goal of fusion power generation. The Burning Plasma Assessment Committee was formed to provide advice on this decision. The committee concluded that there is high confidence in the readiness to proceed with the burning plasma step. The International Thermonuclear Experimental Reactor (ITER), with the United States as a significant partner, was the best choice. Once a commitment to ITER is made, fulfilling it should become the highest priority of the U.S. fusion research program. A funding trajectory is required that both captures the benefits of joining ITER and retains a strong scientific focus on the long-range goals of the program. Addition of the ITER project will require that the content, scope, and level of U.S. fusion activity be defined by program balancing through a priority-setting process initiated by the Office of Fusion Energy Science.
