

Designing the Requirements: Building Applications that the User Wants and Needs (Paperback)

By Chris Britton

Pearson Education (US), United States, 2015. Paperback. Condition: New. Language: English . This book usually ship within 10-15 business days and we will endeavor to dispatch orders quicker than this where possible. Brand New Book. Too many software applications don't do what's needed or they do it clumsily, frustrating their users and owners. The core problem: poorly conceived and poorly crafted requirements. In *Designing the Requirements*, Chris Britton explains why it's not enough to simply gather requirements—you need to design them. Britton offers powerful techniques for understanding stakeholders' concerns and working with stakeholders to get the requirements right. Using Britton's context-driven approach to requirements design, you can detect inconsistencies, incompleteness, poor usability, and misalignment with business goals upstream—long before developers start coding. You can also design outward-looking applications and services that will integrate more effectively in a coherent IT architecture. First, Britton explains what requirements design really means and presents a hierarchy of designs that move step by step from requirements through implementation. Next, he demonstrates how to build on requirements processes you already use and how to overcome their serious limitations in large-scale development. Then, he walks you through designing your application's relationship with...
