

Therapeutic Electricity and Practical Muscle Testing

By William Snowden Hedley

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1899 Excerpt: . every internal organ has its corresponding skin area. In the case of spinal cord diseases this form of excitation is most easily effected by farado-cutaneous brushing. The electric douche is highly effective for the same purpose; its technique is described under Hydro-electric methods. The treatment of tender points may be referred to here. An electrode varying in size with that of the painful area is attached to the positive pole and allowed to remain stable on the tender point for five to thirty minutes. The current density for such a purpose ought not to exceed, for short applications, 1 ma. per sq. in., and in longer applications may even be so low as 2. Experimentally demonstrated by Hodge. The treatment of such areas by sinapisms and hydro-therapeutic methods are familiar instances of this; and almost equally familiar is the faradic brushing of the nape of...

Reviews

This book will be worth buying. Better than never, though i am quite late in start reading this one. You may like how the blogger compose this publication.
-- **Mrs. Kylie Oberbrunner II**

This is the very best publication we have read through right up until now. It is one of the most incredible book we have read through. Once you begin to read the book, it is extremely difficult to leave it before concluding.
