Excerpt from The Latter-Day Saints Millennial Star, Vol. 65: May 28, 1903 Even the inanimate stones are indestructible. Drop a pebble into the water. It disappears. But is its power dead? (notice those small ripples gathering in rings about the spot where the rock-sank. See how they swell and swell until they set every object on the surface of the lake more or less in motion. Even the earth particles on the water's edge vibrate to the waves coming from the center of the pond. So it is with us. The earthly may be laid in the tomb, but the influence remains above ground, and it will ripple in waves of good or bad to the very shores of infinity. Think of the millions of sunbeams chained down in the black dungeons of the earth. Small and inconsequential as they seem, they will one day break forth from their fetters and burn in ten thousand forge-fires of progress. But this is no part of our story.
